### Sources **HANSARD** - http://info.mzalendo.com/hansard/ 11<sup>th</sup> Parliament of Kenya: Report on the Third Session February - December, 2015 DISCLAIMER: i) Speaker Lobby members and Majority leaders are the most vocal Parliamentarians by default courtesy of their official offices. ii) Records of Parliamentarians sharing surnames e.g. Omondi, Nyaga are null and void. Hansard entries are hard to distinguish as the records do not always include their initials.

MZALENDO

@mzalendowatch

iii) Mzalendo has gathered data from the Hansards (National Assembly and Senate) as published by Parliament and analysed the verbal presence of parliamentarians to find out the top performing representatives in the both Houses, using a simple quantitative metric the total number of times the Member of Parliament spoke on the floor as indicated by the Hansard.

Brought to you by:

iv) While it is difficult to measure the quality of a single Parliamentarian, oral statements made on the floor of the House are an important performance measure for both Members of the National Assembly (MNAs) and Senators. Citizens can use the number of oral statements made on the floor of National Assembly or Senate to tell whether or not their elected representative is participating in policy and legislative discussions. i.e. i.e. did the MNA or Senator make valuable comments? Are the MPs and Senators speaking on issues important to their constituents? Is the MNA or Senator delivering on campaign promises? v) To provide a comprehensive metric on Parliamentarians performance, information on their committee participation, individual voting records and attendance data would be useful to have. But with the limited access to this information, Mzalendo has chosen to work with what is readily accessible.
